## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 39-47 and 70-77 are allowed. The following is the examiner's reasons for allowance: The most pertinent art found is Morohashi et al. (US Patent Number 6,043,899). Morohashi et al. disclose a code pattern image recording apparatus which allows easy layout and edit processes of a recorded code pattern image on another sheet surface without being limited by the said and the like of the sheet surface. The other pertinent art is Norris et al. (US Publication Number 2003/0072013 A1). Norris et al. discloses a document creation through embedded speech recognition. Audio data is captured then filtered to extract text data and print commands. The prior art made of records does not disclose the portion of a hard-copy printout comprise encoded dot patterns that do not form text characters but instead correspond to the received sound waves without regard to whether or not the received sound waves for spoken words. And the encoded dot patterns are printed on a surface area of said print media that does not contain other image data that is to be viewed by a person.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, would preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
